Dear Khun Wipusara,

Thank you for your prompt reply. What we have in mind about visiting self-access learning centers in australia is those in the cities that we are going to visit ,namely, Sydney, Canberra and Adelaide. We are very keen to keep track with the technological advancement in enhancing learners to study on their own.

At SUT ,we have developed our own CAI materials for English courses and we are in the process of developing the materials for what we call the Borderless Education Project by way of the internet and other means of telecommunications.

I hope this will give you a clearer idea about what we would like to learn from self-access learing centers in Australia. Since we do not have a lot of time,we would like to confine our trip only to these 3 cities,and preferably Sydney.

Please do not hesitate to get back to me if there are any more queries.

Thank you very much in advance. I'll be looking forward to hearing from you

Songphorn Tajaroensuk
