Dear Professor Umaly,

thank you for your kind mail message and for remembering me with the contact person in Shanghai. I will try to establish contact with the TV University as soon as we start planning our trip in greater detail.

✓ You are welcome to come back on proposals for further co-operation with one of the universities in your region. We can stay in touch on that question. The next four years I will be in a post-doctoral position, working on a project on learning implications in educational settings based on ICT versus campus-based education (Higher education).

I trust that you arrived safely in Bangkok after the trip to our Norwegian fjords, and that you got back home with good memories. We (norwegians) were most relieved that the weather turned out so nice - we know how it CAN be!!

I have tried to send you a mail before, but I got it in return. Let us hope for better luck this time.

Kind regards from Sølvi L.

Dear Ruben,

Thank you for your kind words. I also enjoyed meeting you and all the others in the group and look forward to continued collaboration. I will keep your invitation in mind! One never knows when an opportunity arises.

As for your suggestions about linking Maejo University with Noragric, the best person to respond to this is Gry, who is now familiar with the Change Tropics project, and who is the best person to answer your question. By copying my response to her, I am asking her to contact you directly on this. She is in the midst of a full-day meeting at the moment and summer holidays are upon us soon, but I hope she finds the time to respond.

Best wishes,

Joanna
