Dear Friend,

This is the best article on Organic I have come across in recent years. Thus I am forwarding it to you because it is well researched and important. I hope you get a lot out of it. Best Regards. Since it is a "pdf" file I have added a link to download Adobe Acrobat Reader in case you do not have it.

Dear Joanna,

Once again, please let me reiterate my sincerest appreciation and gratitude for the assistance and warm welcome that you have extended to me during the meeting in Oslo. It was also a great pleasure meeting you and knowing you personally.

I would be most grateful if you could give me information as to how NORAGRIC and the Agricultural University of Norway could possibly help the young EARTH ASIA initiative at Maejo University in Chang Mai, Thailand organize some training courses in Leadership and Change Management as it relates to sustainable agriculture and natural resources development. Maejo University was the venue of the EARTH ASIA organizational meeting and will also be the venue of the next ASIA meeting. Maejo University is the oldest agricultural university in Thailand. They have an International Education and Training Center where we intend to hold such training courses. It will be linked with the EARTH ASIA program. I have talked to Leif regarding this possibility. I wonder if NORAGRIC would be interested to cooperate in this field. Are there teaching-learning materials on sustainable agriculture available from your organizations?

I hope you would have the opportunity to visit Thailand in the near future. Please let me know.

Once again, thank you very much for everything and my best regards.

Sincerely,  
Prof.Dr.Ruben C.Umaly

Dear Mr. Nilsen,

Greetings from the Association of Universities of Asia and the Pacific !!

Firstly, thank you very much for finding the time even on a Saturday to meet us at your very impressive office. Thank you too for the briefing and a copy of the book on Sustainable Business. It is most useful...I am most interested in pursuing the possibility of being involved in the use of your on-line modules in teaching of sustainable development. Please let me know how this could be done.

With best regards.
